We specialize in importing quality USB Flash Drives for promotional purposes. Our USB Flash Drives are sourced from reputable factories using quality components such as Samsung or Toshiba and carry a warranty against defects. We pride ourselves on high standard levels and after sales services to ensure you peace of mind when dealing with us.

Reasons why you choose us as your USB Flash Drive source.

- We import original chips separately and after testing & quality checking, We fix them in USB shells.
- We never import duplicate or upgrade chips and we offer warranty against defect.
- Fast delivery from ready stock.
- Big variety and range of products to select.
- · Competetive prices with higher quality.
- Mock Ups and E-Samples

What are upgraded chips?

Unfortunately some manufacturers using a lower capacity memory and selling as a higher capacity memory.

What are upgraded chips?

- (1) They use a software to upgrade 1 GB to 4 GB. When using the chip in your computer it shows 4 GB but can't accept files more than 1 GB because the real capacity is 1 GB.
- (2) They use 4 pcs of 1 GB chip instead of 1 piece 4 GB memory. When you save a file more than 1 GB it will show an error and if you save a file less than 1 GB it will be saved but when you need to reopen the file, as it is not clear in which one of the chips is saved. again

We never use upgrade chips We use only original chips!

Maxema Antibacterial: design and safety

Take care of yourself even when you write: the plastic we use on our Antibacterial collection prevents bacteria from settling on pen surfaces and passing from one hand to the other.

Why choose Maxema Antibacterial Pen?

The plastic used is antibacterial

Certified antimicrobial additive releases silver ions and prevents bacteria from settling on the surfaces of the pen.

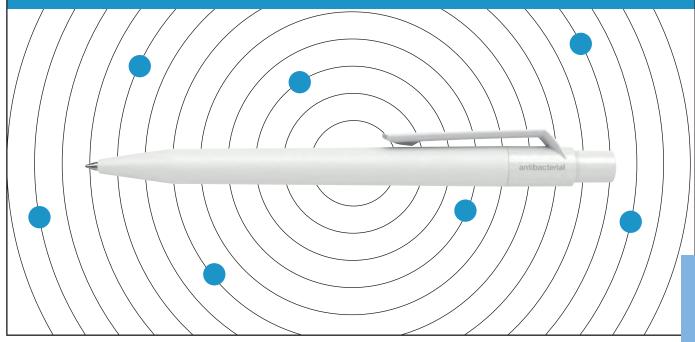

Bacteria: up to 99,99% less

Laboratory tests have shown that up to 99,99% of the bacteria on the pen are destroyed.

We Care about your health

Some bacteria can cause disease and infections: make your life still safer, even when you write.

Bamboo Facts!

As a plant, bamboo is one of the fastest growing in the world. It can grow as much as one meter in 24 hours.

Bamboo crops absorb carbon dioxide and can generate up to 35% more oxygen than the same amount trees.

Using bamboo is not only overall environmentally friendly, it is also one of the strongest material on the planet. Bamboo has a strong, natural fiber that has shown to be superior to similar materials like wood. Although it is strong and sturdy, it is very flexible and doesn't break easily when flexed.
